

The Ecology of Gardening With Native Plants

A Free Seminar

Wednesday, June 13 ▲ 10:30 AM

Atlantic Design Center (in the Eldredge Lumber Building)
627 US Route 1 ▲ York, Maine

Our speakers Julie and Peter Beckford, have grown certified, organic, native perennials for 29 years on Rebel Farm in Liberty, Maine.

Their presentation will help you see the crucial role that native plants have in your home and business landscapes. Native plants will actually bring nature home to your own backyard when you create diversity and build complexity with such plants.

After the presentation Julie and Peter will be available to talk to you about the type of plants that would be suitable for your gardens. Their plants will also be for sale at Eldredge Lumber.

Don't miss this opportunity to listen to and get advice from Julie and Peter regarding your perennial plants.
