Exciting New Trends in Tiles!

By Cathy Rosen

Are you tired of that beach sand scratching your wood floors? Do you have pets that give your wood floor finish a workout? How about those harsh disinfectant cleaners? Wouldn't you really like to get that kitchen floor clean?

Well, guess what? Now you can have it all with porcelain Wood Look Tiles!

From Driftwood, to Barn Board, to a more traditional Oak or Cherry wood, there are wood-look tiles that suit any décor. There is even a wood-look porcelain that looks like it has tree-trunk rings in it!

Whether using this tile on the floor or on the wall, it is set just like other large format tile with a minimal grout joint. With the stain free and stain resistant grouts now available, it eliminates grout discoloration – the number one customer tile complaint.

Please come into the Atlantic Design Center and see these exciting new tiles and the possibilities they can create for your project needs.

crosen@eldredgelumber.com 207.363.3004

Cathy has been designing with tile and stone for over ten years. Classic to Contemporary, Cathy utilizes the extensive product knowledge and industry experience she has accumulated over the years to create and design large and small projects. Cathy's philosophy on design focuses in on listening to her clients' needs and finding them the best products and the best design for their project. Paying attention to the details, and communicating with all parties along the way is the key to a successful outcome. "When you love what you do, it shines through!"
